

COMP 3311: Database Management Systems

Lecture 10 Exercises Structured Query Language (SQL): DML

Author(<u>authorId</u> , firstName, lastName)	Book(<u>bookId</u> , title, subject, quantityInStock, price, <i>authorId</i>)
BookOrder(<u>orderId</u> , <i>customerId</i> , orderYear)	Customer(<u>customerId</u> , firstName, lastName)
OrderDetails(<u>orderId</u> , <u>bookId</u> , format, language, quantity)	

What To Do

1. **Download** the zipped folder **L10ExerciseFiles.zip** from Canvas and unzip it. The folder contains three SQL script files **bookstoredb.sql**, **L10Exercises1-5.sql** and **L10Exercises6-8.sql**.
2. **Execute** the **bookstoredb.sql** script file in **Oracle SQL Developer** to create the database against which you can run your exercise queries.
3. **Modify** the **L10Exercises6-8.sql** script file by constructing your SQL queries in the specified locations in the script file.
4. **Test** your queries to ensure that they do not raise any SQL errors.

This is an **individual** exercise. **EACH STUDENT MUST SUBMIT THEIR OWN SQL SCRIPT FILE.**
A genuine effort must be made to complete **all** exercises to obtain full marks.

USE ONLY SQL CONSTRUCTS DISCUSSED SO FAR IN THE COURSE.
MOREOVER, FOR EACH QUERY IN THIS EXERCISE YOU MUST USE ONE OR MORE
OF THE ANALYTIC FUNCTIONS DISCUSSED IN THIS LECTURE AND YOU
MUST NOT CREATE ANY TEMPORARY RELATION USING A WITH CLAUSE.
NO MARKS WILL BE GIVEN IF THESE REQUIREMENTS ARE NOT FOLLOWED.

What To Submit

Your completed **L10Exercises6-8.sql** script file containing at most one SQL statement for each of the queries that you constructed.

You must submit this completed script file. No other type of file submission is acceptable.

How To Submit

By 6:00 p.m. tomorrow upload your **L10Exercises6-8.sql** script file to Canvas.

Note: You will only be able to submit a file with extension **sql**.

TEST YOUR SCRIPT FILE – USE ONLY SQL CONSTRUCTS DISCUSSED IN THE COURSE

The SQL queries in your submission will be tested by executing them against the **bookstoredb** database. If any of the queries raises an SQL error or if you use SQL constructs not discussed so far in the course, then you will receive at most 0.5 marks for this exercise. Therefore, test your SQL queries against the **bookstoredb** database before you submit them and use only SQL constructs discussed so far in the course.
